

For a swim you can truly feel good about!

## The first and only sustainably made pool material

ReNew is a high-performance, luxury pool film made with 51% pre-consumer recycled content.

ReNew uses cutting-edge UV and anti-microbial additives, coupled with vigorous testing for weldability, chlorine, and abrasion resistance resulting in sustained material brilliance.

## FEATURES

**SUSTAINABLE** made with recycled content

**NON-POROUS** smooth, easy clean surface

**PERFORMS** uv, chlorine & abrasian resistant

**FRESH** anti-microbial additives

**INNOVATIVE** brilliant colors & luxury design

“TESTED, TRUSTED, PERFORMANCE: ReNew helps offset your pool’s environmental footprint.”

## How It’s Made SUSTAINABILITY BUILT-IN

Unlike fiberglass and concrete pools, which rarely contain sustainable ingredients and are difficult to impossible to recycle, ReNew pool film makes vinyl liners an easy choice. Pool films made with ReNew Technology are certified by SCS Global Services. SCS is a world leader in third-party certification, auditing, and verification.
